

User info

The screenshot displays the CAD REPORTING application interface. On the left, a sidebar menu includes options like 'Manage', 'Project views', 'Sheating by panels', 'Profiles by panels', 'Electrical symbols', and 'Advanced export'. The 'Export settings' option is highlighted in green. The main content area shows the 'PDF EXPORT SETTINGS' configuration panel for user 'Jos Stals'. It includes fields for 'Template header title' (Cad Serviceburo) and 'Template header text' (Rondstraat 37, 3640 KINROOI). Below these are settings for 'Paper' (A4 selected), 'Scale' (T selected), and three toggle switches for report content: 'Show project title in header', 'Show view title in header', and 'Show filter in footer', all of which are currently turned on. There are also options for 'Sustainability' (Remove page breaks in export is on, Don't use colors in optimisation is off) and a 'Your logo' section with a placeholder image and a 'Select your logo' button.
